

Village of Canal Winchester  
36 South High St.  
Canal Winchester, Ohio 43110-1213

## SNOW REMOVAL POLICY

The Village of Canal Winchester is committed to providing safe, accessible streets during inclement weather. Below is the policy for street salting and snow removal within the Village. This policy may be adjusted on a case by case basis.

**Salting:** Streets within the Village will be salted in the following order:

1. Arterial streets, including Columbus, Gender , High Street and Waterloo Street.
2. Other collector streets and major streets within subdivisions.
3. Local streets within subdivisions.
4. Cul-de-sacs
5. Alleys.

Re-salting will be done as needed.

**Plowing:** Streets within the Village of Canal Winchester will be plowed in the same order as salting was done. Streets will continue to be plowed until excess snow is removed from parking lanes as well as driving lanes. This is done to free storm sewer catch basins so flooding or freezing does not occur, open the area to the mailboxes and to open areas of parking.

**Cul-de-sacs and Dead End Streets:** The primary manner of cleaning cul-de-sacs will be by salting since there is no where to put excess snow when plowing. Removal of plowed snow in cul-de-sacs will take place when the snowfall exceeds eight inches and **only after all other cleaning activities are completed.** Removal will only take place during normal working hours.

**Downtown Business District:** Removal of plowed snow in the downtown area will take place when the snowfall exceeds eight inches and **only after all other cleaning activities are completed.** Removal will only take place during normal working hours.

**Residents' Assistance:** Residents of Canal Winchester can assist the snow plowing process by:

1. Pile shoveled snow from driveways to the right as you face street.
2. Keep children away from snow plows.
3. Do not build igloos or caves in snow close to the street.
4. Keep parked cars off street.
5. Clean around mailbox to assure mail delivery.
